Code Chunks

To insert a code chunk, press **Ctrl + Alt + I** in the source pane (top left pane in the default settings of RStudio).

```
library(ggplot2)
ggplot(iris, aes(Sepal.Length, Sepal.Width, color = Species)) + geom_point()
```

Including Plots

I can also embed plots, for example:

```
data(USJudgeRatings)
plot(USJudgeRatings$DECI, USJudgeRatings$PREP,
     main="Relationship Between Judge Preparation and Decisions",
     pch=16, col="blue")
```
